GDD - HEIST: ESCAPE

Ariel Gutierrez

SUMMARY

ELEVATOR PITCH

Heist: Escape is a platform game where the user plays as a thief that is robbing a bank. Throughout the game, the player has to avoid police officers that are stationed around the building. The objective is to collect money and climb to the top of the bank to escape in a helicopter.

DESCRIPTION

Heist: Escape is a game with a 2D pixel art style that is similar to other platform games, such as Mario Bros. However, instead of the screen moving horizontally from left to right, it moves vertically from bottom to top. In this game, the goal is to reach the highest building where a helicopter is waiting for the player to escape. Along the way, the player can collect money bags, gold, and gems to get a higher score!

- Engine: Unity
- Platform: PC
- Art Style: 2D

FEATURES

- Player
